

TROOP 121

Weather Rock

If it is moving back and forth the wind is blowing

If it is not moving there is no wind

If it is wet on top it is raining

If it is moving in a circle there is an earthquake

If it is dry on top then no rain

If water is frozen on top it is freezing

If it is white on top it is snowing

If there are small snow balls on top then it is hailing

If it is flying in the air in a circle there is a tornado

If in the air in one direction there is a hurricane

If it is missing it was stolen

If the rock is hot the sun is shining

If the rock is cold then it is an overcast day

If the rock speaks to you then you are on over load and need a nap

If the rock is split in half there is a lightening storm

If there are white spots on top a bird had come to visit the rock

If it is on the ground it forecasted incorrectly and

will be replaced by a new weather rock soon
